Vitalii Shvets

Technical Support Engineer · Aspiring Java Developer

Ukraine (open to remote) · vetaldmc@gmail.com · Telegram: @vetalDmc · github.com/dbnfkmzyj-hash

SUMMARY

Engineer with 6+ years of hands-on experience in solar power systems and industrial automation, from installer to head of an installation department, plus remote L1/L2 technical support and VIP account management in iGaming. Delivered turnkey projects end to end: site survey, design, quotation, procurement, installation, commissioning and customer handover. Designed automation solutions, led crews, negotiated with clients and suppliers. Now moving into software development: learning Java and building a portfolio. Seeking Technical Support, Application Support or Junior Java Developer roles.

SKILLS

Technical: Java (OOP, console applications, in progress), C++ basics, Git/GitHub, technical troubleshooting L1/L2, remote monitoring and remote access tools, wiring and automation schemes, technical documentation, electronics repair.

Tools: Jira, Confluence, Asana, Trello, Slack, Salesforce, Novatalks, Intercom, Google Sheets, Notion, Obsidian, MS Office.

Business: project planning, procurement, budgeting and reporting, team leadership and delegation, commercial proposals, client negotiation, process optimization.

EXPERIENCE

VIP Account Manager May 2025 – Mar 2026

Alius Holdings Limited (iGaming), Remote

- Managed a portfolio of VIP players through chat and email (Novatalks/Salesforce), building long-term relationships with personalized service and fast response.
- Configured bonus campaigns for sports and casino in UBO and automated offers with the promo constructor and codes.
- Handled account operations: verification, data corrections, deposits and withdrawals across payment systems.
- Coordinated with other departments on complex cases; tracked client interactions in Google Sheets.

Specialist, Customer Support Mar 2025 – May 2025

Alius Holdings Limited (iGaming), Remote

- Resolved customer requests using CRM, Jira, Slack and Asana; learned bonus rules, wagering conditions and gamification mechanics; kept response times short and satisfaction high.

Technical Support Engineer Apr 2024 – Mar 2025

Iskra Energy, Remote

- Provided first- and second-line remote support, diagnosing faults in solar and off-grid systems through remote monitoring platforms.
- Created and updated wiring diagrams and technical documentation for customers and installation crews.
- Set up remote access tools to resolve issues without site visits; trained staff and customers remotely.
- Reduced incident resolution time by 30% by writing step-by-step guides.

Operations Director, Installation Department Sep 2023 – Apr 2024

Iskra Energy, Odesa

- Planned and coordinated solar installations of different scale; controlled deadlines and budgets.
- Optimized management methods and reduced costs by 40% without loss of installation quality.
- Trained crews on new equipment, worked with suppliers, developed automation solutions.

Foreman and Commissioning Technician Feb 2021 – Sep 2023

Iskra Energy, Kryvyi Rih / nationwide

- Led installation crews on projects across Ukraine: planned work, assigned tasks, controlled quality.

- Handled procurement of components, project cost reporting and crew payroll.
- Prepared commercial proposals and took part in client negotiations.
- Reviewed technical documents and wiring schemes to ensure correct installation.

Solar Installer and Commissioning Technician May 2020 – Feb 2021
Iskra Energy, Kryvyi Rih

- Surveyed and calculated roofs; installed panels, inverters and switchgear; configured and maintained systems.

Shift Electrician Aug 2018 – Sep 2019
YuGOK, Kryvyi Rih

- Maintained motors, lighting circuits and automation; designed automation schemes and introduced new systems.

Self-employed Electronics and Appliance Repair 2016 – 2018
Kryvyi Rih, Svitlodarsk

- Diagnosed and repaired phones, tablets, laptops and household appliances, including board-level soldering of components and microcontrollers; rewired apartments; won clients with basic marketing.

SELECTED PROJECT

Generator auto-start controller. Designed and implemented an intermediate unit between inverter and generator that starts the generator when battery charge drops to a set level, controlled through the inverter's dry contact.

EDUCATION

Junior Specialist Diploma, Installation and Maintenance of Automation Systems, Kryvyi Rih College of the National Metallurgical Academy of Ukraine, 2014 – 2018.
